Model 7030-6X Oversize Extended Chain Link Handcuff Nickel Plated Finish

The Model 7030-6X has additional links to accommodate individuals with larger upper bodies and wrists. The extra links give 5 1/2 inches of distance between the cuffs. The added space reduces shoulder, arm and wrist strain for larger individuals. The Model 7030-6X eliminates the need to link two sets of cuffs in order to restrain one individual.

The Model 7030-6X incorporates spun rivet construction for increased strength and durability. Smooth single strand action allows for fast and efficient cuffing. The profiled edges minimize the risk of tissue and nerve injury.

The Model 7030-6X uses Model 7030 Handcuffs which are designed and manufactured to meet National Institute of Justice standards for strength, workmanship and finish. They come with a lifetime warranty for manufacture defects. Two keys supplied. Made in USA.
