

## Model 703 - Leg Iron Yellow Color Plated Finish

The Model 703 Leg Iron will soon be available in a yellow finish. The color finish helps to prevent equipment loss by allowing individuals, agencies or departments to more easily identify and track property. Color can also be used to enable or reinforce a classification system such as threat level, medical condition, jurisdiction and more. Also available in red, blue, orange and pink.

The color coating is applied using a process called Electrolytic Polyurethane Plating (EPP). EPP fully coats restraints inside and out without interfering with the lock mechanism or jaw swing-through. The durable EPP finish is resistant to chipping and scratching. The rust resistant EPP finish exceeds the National Institute of Justice's 12 hour salt spray testing standard.

The Model 703 Leg Iron features all steel construction, spun rivets and a rust resistant nickel finish. It is made to meet or exceed the National Institute of Justice standards for workmanship, mechanical strength, tamper resistance and corrosion resistance. The 15" chain effectively limits range of motion. Lifetime warranty for manufacture defects and two keys supplied. Made in USA.
