Chain Link Handcuff

Model 7002CHS
Waist Chain with Separated Cuffs

Model 703CHS
Leg Iron

High Security Restraints

Peerless® high security products are designed for high risk prisoner restraint and transport situations. These products do not operate with a standard handcuff key. The restraints incorporate standard product with a MEDECO® or ASSA® Desmo high security lock system and aluminum housing. Both MEDECO® and ASSA® Desmo use restricted key control systems to prevent unauthorized key duplication. Multiple sets can be ordered with the same key code or different key codes.

Now available with the new Dead Bolt Security option. Dead Bolt Security complements the standard lock with an additional locking position for added security. When engaged, the Dead Bolt feature helps to secure the double lock against brute force and finessed picking and shimming attacks. The Dead Bolt option is only available with new or existing MEDECO® style key plans.

High security locks are available as chain link handcuff, leg iron and waist chain. Other features include improved internal lock mechanism, spun rivet construction and double lock capability. All products come with two keys, a double lock activator, and a lifetime warranty for manufacture defects. Made in USA.

All Peerless® products are backed by our lifetime guarantee for manufacture defects, assuring you of the highest quality material and workmanship. When you want restraint devices that you can depend on, you want Peerless®.

MEDECO® is a registered trademark of Medico High Security Locks. ASSA® Desmo is a registered trademark of Abloy Security, Inc.

| Model | Material | Finish | Weight | Max. Overall Length with Chain | Max. Length between Cuffs | Max. Diam. (First Tooth) | Min. Opening | Max. Internal Circumference | Min. Internal Circumference | Min. Diam. (Last Tooth) |
